

HDMC heavy duty modular cleanable rotary valves and BSMC blowing seals

HDMC Rotary valve with direct drive

BSMC Blowing seal with direct drive

HDMC Rotary valve with chain drive

HDMC Rotary and BSMC Blowing seal cleanable range is a cost effective solution based on the HDM/BSM valves for occasional cleaning of the valve internals. The non-drive end cover can be quickly removed to gain access for cleaning which can be carried out by plant operators without the need for special tools. Various standards of finish are available to suit most hygienic applications; however, for the more stringent requirements and frequent cleaning consider the HDMF/BSMF fast clean rotary valve range.

With the design being modular and the cleanable range incorporating a tapered rotor, this valve can be converted into a fast clean version (HDMF/BSMF) by simply retrofitting guide rails and the Rotalign™ bearing assembly, which is our selfcentralsing rotor design.

Typical applications

- Metering device, airlock, explosion containment, flame barrier and system isolation.
- Suitable for gravity, positive pressure and vacuum conveying systems.
- Powders, granules, pellets, grain, feed and chips.
- Can be adapted for virtually all types of product characteristics.

Advantages:

- Tapered rotor and bore.
- Over 15,000 different configurations that can be adapted to suit virtually all applications
- 18 Month warranty.
- Valve housings are individually pressure tested for 10 bar(g) explosion and flame containment requirements.
- Backed up by 90 years collective applications experience.
- Can be converted in to a HDMF/BSMF fast clean.

Specifications

Size	• 150-400 mm
Throughput	• Up to 50 m ³ /hr
Flanges	• Round or square, special flange configurations available
Construction	• Cast iron, aluminium or stainless steel, special material grades available
Drive	• SEW chain or direct drive as standard
Finishes	• Polished, wear-resist hard chrome or tungsten carbide, non stick PTFE
ATEX	• Full range of dust and gas zones - 10 bar(g) fully autonomous versions
